Ultimate Whois Script, Oct 15th, 2003

Reviewed By: hosteria

We spent a great deal of time trying to find a whois script that fitted into our site but always came up short. Every script we came across was too restrictive.

This programming, however, is first class and the service we received after the purchase meant that it was up and running within a day. I am not a programmer, but this is a very easy to use and versatile piece of work. It fits well into our site and we altered it around to suit our own purposes.

Well done Chris!
