I like this tool as it is easy to generate a basic user interface for any of my online MySQL database. It's nice to see that I don't have to install 100-1000 files to check only table data.

### **Trying to install it**, Aug 1st, 2008

It seems a quite good script, but I couldn't install it. The zip file contains a install.jar file , but there are no info about how to install it. I'm still trying to install it. If anyone can help, it will be very good.
