### **Terrible Script**, Dec 21st, 2006

Reviewed By: David P

This calendar script is bloated and complicated to set up. You will need coding experience to get it up and running. It will also help if you have good problem solving skills, as you will need it. My vote on this script is low, due to it's being complicated and difficult to setup and use. The instructions are poorly written and leaves you wondering what you just read.
