I've used a lot of free scripts from many different companies, but the FreeFind Search Engine was the easiest to set up, and allowed me the most freedom - ensuring that this looked like a part of my site, not an add on from someone else. I can't get over how easy it was and how professional it looks. You can't ask for anything more.

It's not often that you find a web service that is easy to use and reliable, but it seems FreeFind has pulled it off. I definitely recommend the site search above all of their other services (though they're all wonderful). You can customize a lot of the content, and choose your backgrounds and banners - not to mention whether you want users to just be able to search your site or the web too.

Can't say enough good stuff about it! Try it!
