Nevron Chart for .NET

Hits: 1,625

Description: Nevron Chart for .NET is designed to be extensible, efficient and feature rich. It wraps a vast amount of features in an intuitive and straightforward programming model. The component can display virtually any 2D or 3D chart. It also includes linear and radial Gauges featuring multiple indicators, multiple gauge axes, intelligent gauge scale decorations and many more. Other charting features include scrollable axes, integrated legend, chart annotations, watermarks and very extensible chart layout manager. The component features full AJAX support for WebForms and full Visual Studio design time support with many advanced features like style editors allowing you to quickly modify the chart with the visual interface only. The control also includes a custom toolbar and an integrated data grid components that can come handy in advanced charting applications requiring high degrees of interactivity features.
