HTML Rotate

Hits: 3,113

Description: HTML rotate is a simple solution to randomly rotating almost anything on your web pages. With ease, you can easily rotate banners, enhanced banners, flash banners, images, affiliate links, quotes and almost anything else. HTML rotate can also be used as a substitute for SSI (server side includes) to include menu/navigation bars, images, etc. A totally free script and comes with a comprehensive control panel and setup interface for easy installation.
