SystemMonitor

Hits: 2,704

Description: This is a system monitor program that runs on a unix server. It checks every 5 minutes to see that your servers main functions are operating within normal parameters and emails you immediately if they are not. SysMon checks for Per-Process Memory Usage, Global Memory Usage, Swap Memory Usage, CPU Usage by limits, Disk Space Usage, Load Average, SMTP Service, POP3 Service, TELNET Service, and FTP Service.

Resource Specifications
