Free Help Desk QuickIntranet

Hits: 37,883

Description: Free Help Desk Software developed in PHP. This Customer Support Software is best suited for handling help desk calls in an I.T. department but can easily be modified to fit other needs. Please visit our site to download the free software, and try a live online demo of the help desk software. We update our helpdesk software regularly in response to customer feedback and to ensure maximum compatibility, so please check our web site often for free updates. Now supports MySQL or Access Database backends.
