Secure FTP Factory

Hits: 2,136

Description: Secure FTP Factory is a set of Java based client components for communicating with FTP servers.

The FTP component offers complete FTP functionality including the ability to transfer files, rename files, delete files, create directories, transfer directories recursively and more. The SFTP (Secure FTP) component offers all the features found in the FTP component with the added ability to encrypt FTP data using a secure SSH channel. Using the SFTP component you can be assured your data is protected as it travels over the Internet.
