CodeBase® Bundle for Windows & .NET

Hits: 904

Description: CodeBase® Bundle for Windows & .NET is a high-speed database engine for Windows and .NET developers. Build standalone applications in single-user or file-sharing multi-user configurations, or take advantage of the client/server support and create database solutions accessible over a network or the Internet. Your applications can use enterprise-level features like transaction processing, logging, backup and intelligent high-speed queries, and can share files with all other CodeBase products.

Resource Specifications
