Visual Help

Hits: 888

Description: Get your help file organized! Crisp, fresh new look at a very reasonable price!

You can add as many pages as you wish using your HTML editor such as Frontpage. Organize your help files and customize your menus to present a great looking help book!

Includes search capabilities. Menus use java applets and fully customizable. The pages are all in HTML and ASP. No database to install, pure HTML and text.

One domain license, some source code is protected. For source code, a Developers License is available.
