## ActualAnalyzer Lite/Pro/Gold/Server

Hits: 40,721

**Description:** ActualAnalyzer is a powerful statistics-gathering and analysis tool for monitoring web site traffic. It is equally effective for sites with low and high volumes of traffic and provides a wealth of comparative and analytical information. High performance is achieved by using a MySQL database. A great deal of statistical information and various specialized reports allow evaluating the efficiency of a web-site, analyzing site audience, and making marketing decisions based on current traffic trends.

Customizable settings make your work more comfortable and a wide array of features and functionality allow you to increase productivity of your e-business.

**Excellent!**, Jan 12th, 2004

Reviewed By: chrisonline

This Analyzer is an excellent script!

The Free Version ist working wonderful... The Layout/Design is the best i have ever seen.. (WebSkins for Download)!

The only bad thing is, the free script displays olny a view of parameters.. (no browser, no country, no visitors, etc..)

**Be wary of this "company"!**, Oct 26th, 2004

I purchased the pro script and have to say I am not happy with it. It is a nightmare to configure and setup on your site. The script cannot handle dynamic webpages and requires the user to manually add every single page of their site to the script to monitor. You can imagine how time-consuming this can be!

When I asked for a refund, the "company" refused, said I was a software pirate and did not bother to help me with my problem.

From the appalling english and tone of their emails, I have gathered that this "business" is actually a single person called Alexander (probably a teenager) working from Russia.

Be very wary of this "company" and it's products. Their manuals are written in pigeon english, their customer service is poor, their terms of purchase are laughable and you will not have an easy time implementing and using a service which they claim to be easy to setup and use.
