# ppC++

Hits: 1,504

**Description:** ppC++(acronym for "ppC++ preprocessed C++"), is an HTML-embedded C/C++ language adapted especially for active web pages programming. This preprocessor lets you write server-side programs in C++ inside your HTML code and brings new additional features which make web programming very easy. ppC++ was developed for those, who need high performance, stability and harmony in simple HTML enviroment. For those, who know C or C++ and has some skills in HTML, don't wish to learn new interpreter languages like Perl, PHP or ASP and wants to start creating dynamic web-pages immediately. If you are C/C++ programmer, you will start developing full-featured dynamic server pages of full value and ease of HTML tags in a few hours.The main goal of ppC++ is to bring classic C/C++ adopted in simple and rapid development of dynamic web pages.

## Resource Specifications

<b>Version:</b>	0.48.2
<b>Platform(s):</b>	Unix, Win32
<b>Price:</b>	Free (GPL)
<b>Date Added:</b>	Nov 13th, 2003
<b>Last Updated:</b>	Nov 17th, 2003
