FilesOnTheGo

Hits: 1,883

Description: With FilesOnTheGo you save all the hassle of carrying your laptop or worrying about bringing the right documents with you. All you need is a computer with access to the Internet to begin remotely accessing your documents anywhere, anytime. FilesOnTheGo allows users to access, view, modify, and print documents in various formats stored in their computer, remotely. Once the necessary changes have been made, users can upload and save the modified documents back to its original location. FilesOnTheGo is a great low-cost alternative to high-priced remote document management and access software.
