Excellent program. Easy to use, simple setup, and very effective. Once you get this setup, hits to your site will come rolling in, and you'll see rankings increase like crazy. Just all around excellent. If you have a site, and want to get it more hits, this is the program for you. A++++, highly recommended.

Referral Genie is a great program. I've never seen a script like this that works so quickly and simply. You will almost instantly see an increase in the popularity of your site, and your site's ranking will rise dramatically after you get the script running. The GUI is intuitive and makes the script easy to set up and get running. I also like the ability to email reports. I highly recommend this program to any webmaster who wants to see their site get more visitors and higher rankings.

It worked great at first and the tech support was wonderful. Then it stopped working after about 2 weeks and no one will return my emails. The program is now useless.
