Aurigma Graphics Mill

Hits: 1,171

Description: Aurigma Graphics Mill 2.0 is a set of powerful, fast and memory-friendly components which resolves most of image processing tasks: load/save files of most popular formats, enhance, transform, display, reduce colors, combine images, draw imagery, etc. It includes handy control which allows to zoom, pan, scroll image, select areas of the image and so on. It allows to apply color management (using ICM 2.0), so you can handle CMYK images gracefully.

Resource Specifications
