## Live Support Chat with Video and Audio streaming! Hits: 3,601

**Description:** This is a tool with which you can offer live support chat directly from your web page. Simply sign into your user interface and watch all the activity on your website take place in real-time. You are able to send a request to chat with any active visitor on your website. You will also be alerted right away when a visitor requests to chat with you. Once the chat begins, you are able to communicate via chat and even stream live video & audio back and forth between you and the visitor.

+Top Features+ Easy to use Flash Chat Screens; Custom online/offline status icons; Searchable chat logs; UserWatch monitor allows you to view all visitors on your site and what page they are on; Ticket Manager; File sharing with other operators; Use anywhere that html is allowed (eBay, e-mail, your web site, etc); Two-way video & Audio; Multiple operators; Multiple categories/departments; Lots, Lots more. === Free Trial === Ask about our partner programs!
