Liquid XML Data Binding Wizard

Hits: 1,345

Description: The Liquid XML Data Binding Wizard 3 is a sophisticated code generator that provides an object interface in your chosen language over any XML Schema (XSD, XDR or DTD).

This allows any XML Document that complies with the schema to be serialized in, modified, and written back out without the need for the developer to have knowledge of XML technology.

The XML Wizard produces code that enables you to access your XML directly from a purpose built C# .Net, C++, Java, and Visual Basic 6 class library.

Resource Specifications

Version:	3.0
Platform(s):	Win 98 or above
Price:	Free Trial/£395
Date Added:	Nov 27th, 2003
Last Updated:	Dec 1st, 2003

Average Visitor Rating:  **4.50** (out of 5)

Number of Ratings: 2 Votes
