# MX Looper Suite CF

Hits: 1,367

**Description:** For Dreamweaver MX programmers who create dynamic websites, MX Looper Suite is a collection of Commands and Server Behaviors for the PHP, ASP and ColdFusion server models that create complex repeated regions. Unlike the Macromedia default repeat region that allows you to create only simple loops, our product helps you easily create dynamic generated webpages including nested repeat regions and horizontal loopers. Features: --Horizontal Looper Generation; --Nested Repeat Regions; --Multiple server model support.

## Resource Specifications

<b>Version:</b>	3.6.5
<b>Platform(s):</b>	windows, osx
<b>Price:</b>	\$30
<b>Date Added:</b>	Dec 3rd, 2003
<b>Last Updated:</b>	May 23rd, 2006
<b>Author:</b>	InterAKT Online
