Changing the appearance of checkboxes

Hits: 475

Description: This script automatically replaces all checkboxes with your own cool checkbox-image without the need to change any HTML. Your forms will keep working like they did before.

Cool but not enough., Nov 5th, 2007

This is a cool script, it's really simple and efficient, but there's one thing it lacks to completely suit my needs. It doesn't take into consideration possible checkbox activity triggered by use of labels. When a checkbox is checked by clicking on a label, the image stays unchanged, hence I can't use it in my form. Too bad.
