## EP-Dev Forum News

Hits: 6,919

**Description:** Takes forums posts from one or more forum categories and arranges them in a news format. Works with vBulletin, Invision Power Board (ipb), Web Burning Board (wbb), YaBB SE, Simple Machines Forum (SMF), and phpBB. It will display a specified amount of posts on a page and give recent headlines from one or multiple forums. News post display contains title, news text, comment number, author, date, avatar, etc. It will automatically detect and display all smilies and popular bbcode. Headlines and news can be combined from multiple forum categories as well as multiple forum installations. News can be cached for fast display and failsafe display. The new version includes support for RSS / XML feeds, allowing a website to display news from several feeds and forums. Includes a full Control Panel with template support.
