Anaconda! Director

Hits: 2,647

Description: Anaconda! Director allows you to have a single search form that can redirect the user to many different scripts or URLs based on the contents of the form. For example, you can have a single search text field, along with a dropdown or radio buttons to choose between searching Auctions, Amazon Books, MetaSearch, or eToys. You can use A!Director to redirect to other URLs as well.

Resource Specifications	
Version:	1.1
