It has all kinds of details that you can't really find in others. It's cheap too!

- 1) Multisites supports
- 2) Export stats as ms word or excel
- 3) Detailed graph w/ GD lib
- 4) It's a javascript base. That's what I like because I have many websites that I am not able to log their traffic in server level
- 5) Cool features as Pages by search engines, Pages by search words, Pages by search phrases

Suggestions:

- 1) Sort all domain traffic
- 2) Display toolbars stats (e.g.: Alexa)

I strongly recommend it!
