Evaria Mail Client

Hits: 4,704

Description: The Email Client is a rather advanced contact form script, allowing both text and files to be submitted simultaneously. A variety of functions prevent your visitor from spamming your website and loading malicious programs.

Nice piece of code..., Apr 27th, 2004

Reviewed By: agenda

Nice little email script that checks the senders input before allowing it to hit the mailbox. After using it I've not received any unwanted emails from my website! File upload is an additional great feature!!

I recommend this script to everyone else who needs a reliable email form on their site!!!

Excellent mail script, Feb 19th, 2008

Reviewed By: grjohn

Fully documented instructions made it easy for me to install. The script is fully commented and very easy to customize completely. It was totally free, and out of seven pages of searching on hot scripts. It is the only one that I found with multiple upload to a SERVER that is free! Thank you!
