Main.cgi

Hits: 3,586

Description: This program is designed to run your entire site from a cgi program instead of html. The advantages are: You save on web space (html is only coded once), You can log each page, who hit it and when, Each page can have the same headers and footers, or using this script's advanced selection abilities, you can easily specify different headers and footers for each page, and Easy updates.
