txt/ipCounter

Hits: 4,560

Description: Its very easy to install and use! All it does is what every counter does: It counts on each visit of an user. But it will store the IP so it can count the visitors instead of hits and you can view the IPs of the last visitors. It also has the option to ignore the wabmaster if you have to check the page very often but dont want to be counted. I have added a password protection for your security. It also shows the last update of your page!

Resource Specifications

Version:	1.1
