### **Disappointment to the fullest**, Apr 3rd, 2006

I have been having problems with this software, and its development company for months now. Aside from the most awful support and customer service I have ever seen. Its very suseptable to injection. Does little to nothing in the area of input validation, no mod10 on the credit cards, and a very, very rigid template system. Came to them with an error in a dll, I was originally given est. "under 1 hr", and Now italmost 6 weeks later, I the only updates I get is when I beg for them.
