Date - time picker, Mar 6th, 2005

Reviewed By: nstone

I just got the date picker last week, and have already used it a half-dozen times. It's really useful ensuring that web date-entries are properly formatted (even if you have to further tweak the formatting yourself occasionally.) Only one gripe -- it disappears behind the browser if it loses focus, and does not regain focus if it is called again. Otherwise, a little gem. Thanks Tong.
