## EZNewsletter

Hits: 15,741

**Description:** A simple Newsletter script that is double opt-in, the subscriber needs to confirm the subscription before they are finally added to the list. The subscriber can opt-out by clicking on a link in the initial email or by entering their email address on a cancel page. Admin writes the Newsletter online and sends it in either HTML or TEXT format. Admin section is password protected. Database can be purged of all subscriptions that have not been confirmed within 7 days as well as the ability to Compact/Repair, Backup and Restore the database. Version 3 now utilizes Templates, you can create and edit multiple templates! Admin can also add and delete email addresses manually.
