Description: WizMySQLAdmin is a PHP script to manage MySQL databases. If your web site uses a MySQL database you can manage its contents with WizMySQLAdmin, as you can do with the most known phpMyAdmin: but my script is very simple to configure and use, because it's composed by only one file. So you can install it on your web site very easily.

Absolutely perfect for my needs - I needed a db export uploading FAST, phpMyAdmin took 20 minutes to upload, then I discovered I hadn't configured it properly...

WizMySQLAdmin was incredibly easy to setup, took less than 5 seconds to upload, and voila, my job is done.

Many thanks indeed.

WizMySQLAdmin is simply wonderfule and simply simple. It's load's much faster than phpmyadmin,and has a nice interface. I was very tired of waitng on phpmyadmin page's to load, but not anymore. WizMySQLAdmin is perfect to run everything from small queries to large scale imports on.
