Imager Gallery

Hits: 24,600

Description: Imager Gallery is an ASP based webbgallery that is really easy to setup using a webbased interface. It supports most major Image/Upload components available and support for more is added on request. You can upload your images directly to the gallery via your browser and the script handles the rest! Check out the projects webpage for more info, a live demo and downloads!

Excellent Little App!, Aug 21st, 2005

Reviewed By: rokudan

I spent the better part of this weekend looking for a simple, but complete image gallery web app. Oh, and since it is just for personal use I wanted it to be free.. I know, it's a lot to ask for! Well I came across this one, downloaded it, and installed. It offered me everything I needed. It even comes with a free image resizing DLL for dynamically resizing images for the thumbnails. Unfortunately for me, my web server's CPU, a Pentium 266, was a bit to slow for the dynamic resizing. So with the authors help, I got File Thumbnails working, so they are now static, manually created thumbnails, and it works perfect!!

Fast email support from the author, and a great piece of software! Thanks!
