# DBConvert for Access & MySQL

Hits: 1,439

**Description:** DBConvert for Access & MySQL is a database converter which performs MS Access (mdb) to MySQL and MySQL to Access conversions. Features: Unicode Support, Primary keys and Indexes conversion, Interactive (GUI) mode / command line mode, renaming of tables, fields, indexes before conversion. There is an ability to save data to PHP script or to a dump file that allows you to get over the restrictions on access to MySQL database if any.

## Resource Specifications
