## Counter Code Enterprise Edition

Hits: 9,399

**Description:** Start your own web counter and web statistics service, offering page counters and usage statistics to users with CounterCode.

CounterCode is a powerful web statistics hosting script that allows you to run a paid counter service, with the option of offering users a free account with limited features.

Users can sign up, change settings, view statistics and more through the user interface. Weekly statistics can be automatically delivered by e-mail to users. All web counter images and user interfaces are completely customisable.

CounterCode includes a full admin interface with the ability to manage user accounts, prune inactive accounts, e-mail all users, add counter styles and maintain the database.

### **Absolutely Flawless**, Nov 19th, 2005

Reviewed By: tracecomusa

This is hands down THE script to purchase if you want to offer a free or paid counter service. The script is absolutely flawless, sets up in minutes, is easy to customize, and support is tops. I've looked at almost all similar products online. Don't bother looking any farther!

### **Counter Code**, May 27th, 2006

Reviewed By: Subsidence

I have bought this program hoping I could do some in depth web statistics. It turned out the program does not work at all and the manual does not tell a word about how to put the php script into a webpage. There is feedback but not to any substantial help. I do not recommend this program and it is pretty expensive.

### **Didn't work for me**, Feb 10th, 2008

Reviewed By: tbone0690

Purchased the script and it did not function. It also added about 400 entries to the error log in about 20 minutes. Submitted ticket for the 'included support' and have yet to receive a response after a week.
