Highly Recommended: 2 thumbs up! Excellent product and stellar support

Reviewed By: thatdogstore

As a small business owner with basic computer skills, FlexCMS allows me to update my own site without having any programming knowledge. FlexCMS is easy to use and the hosted plan option allowed me to get my website up and running quickly! And to make matters even better - I was also able to purchase my domain name at the same time, which saves me money and time!!

I also used FlexCMS' template service to create my own individual design. They were great to work with and helped me to create a very distinctive look. I am very picky and want every "i" dotted and "t" crossed and it was a real pleasure to work with people whose focus is excellence in performance.

The small price I paid for this amazing product has paid me back many times over and I am proud to direct people to my professional looking website.

Many thanks to the great folks at FlexCMS. I highly recommend it and the support staff rocks! 2 thumbs up!

Up and running out of the box, Apr 18th, 2005

Reviewed By: jacmgr

My needs were small but specific: user management, content management, forums, and gallery. I tried many of the free CMS's but none met the requirements out of the box or were so cleanly integrated as FlexCMS. On top of that the support staff was quick and responsive with real answers and solutions. Rather than just suggesting ways to solve my problems, they solved them! I quickly got my site up and running and once I was satisfied that the program would do everything I wanted, I took the plunge and paid for a subscription to add more features. My group members are satisfied with the use as well. Thankx Flex team!

Flex CMS, Apr 25th, 2005

Reviewed By: usdragnet

I've been using FlexCMS for just about a year now and I have to say it's the best. It is very user friendly, even for the computer illiterate like myself. The support staff is very courteous and there to help when I need them. Uploading pictures, adding HTML and creating pages is a breeze. I also love that I can track the hits I receive on a daily basis and referring pages, create newsletters, sell merchandise and that's just the tip of the iceberg. I'm always getting compliments on my site. People think I worked very hard on it, but I tell them it's not me, it's FlexCMS and they can do the same, it's really that easy. Do your self a favor and try it, you will not be disappointed!

FlexCMS is fast and easy!, May 4th, 2005

Reviewed By: minniefreak

I've been in graphic design and printing for 25 years and have dabbled in web design for the last 5 years, but haven't really had the time to learn HTML, etc. to the extent I wanted. I quickly found out that building web pages is not as simple to me as using graphic design packages.

Recently, a friend referred me to FlexCMS. So, I thought I would try it out. After reviewing the FlexCMS website and playing with their online demo, I felt sure I could use this product for my needs. I purchased the Free Hosted plan and much to my surprise, within a couple hours, FlexCMS support contacted me to let me know my site had been installed and was ready for me to start making pages, etc.

I am amazed at how simple FlexCMS made creating web pages. Using my graphic design skills, I was able to create my own template and then sent it off to the FlexCMS template team to do their magic. Within 24 hours, my template was up at my site and I'm thrilled with the entire package! The staff at FlexCMS is very friendly and helpful!

I plan to use FlexCMS for all my websites in the future and highly recommend FlexCMS to you!

Thanks for making it easy FlexCMS!

The best I've used by far!!!, Aug 9th, 2005

Reviewed By: deedee

I have used many of the open source scripts, Mambo, Xoops and some others. Some modules made sites unstable and support was lacking as developers move on to other projects.

I installed FlexCMS and right away liked the clean well thought out control panel. In no time, I decided to use this and purchased the Standard license to be able to use more modules (already there , ready to install with a click!) as two are allowed on the free license. The charge is tiny compared to the level of knowledgable support - that alone is worth the price!

I am more impressed everyday as I use this to re-do a site. This would be appropriate for so many applications, member based sites, businesses, and it is easy to learn and to customize.

Hands down, it's simply the best!, Aug 13th, 2005

We love using FlexCMS for our organization. We are a small staffed no-kill animal shelter and needed to have a way to easily update our site without having to spend hours of time learning a software product. Our web developer introduced us to FlexCMS and we couldn't be happier. The staff at FlexCMS has been wonderful to work with and their support is outstanding! We've already started reaping some rewards by saving money on postage for our snail mail newsletter. Thanks to FlexCMS' newsletter module, we've been able to offer an online subscription to our newsletter and our members and visitors can read it online or get it via email. Visit our site at <http://www.allcatsinc.org> . Do yourself a favor and try FlexCMS today - you won't be sorry!

A Smart Choice, Oct 11th, 2005

Reviewed By: gdog67

FlexCMS is an excellent CMS product with an easy to use user interface, which in my experience is often the downfall of many other CMS or Portal systems. It is one thing for a trained IT person to use a CMS but it is another thing to hand it off to a client with minimal technical abilities. If you are a web developer, FlexCMS is a great addition to a website or for an entire website depending on your client needs. It is easy to install, flexible, cost effective and the support is excellent!

Great Package, Oct 18th, 2005

Reviewed By: jmcamper

This is a great software package. Easy to use, lots of features and requires very little knowledge of web design. The support is great, quick answers and great people to work with. They did a custom template for my site in less than 4 days for very little cost.

For the money this is a great package and you can try it for free just to make sure it will work for you and your site...

Love it!, Jan 12th, 2006

Reviewed By: needlekathy

FlexCMS has made me more profitable! I love being able to change my website pages, add photos, track hits, and more when I want to without having to wait for anyone. When I started adding photos to my site, my sales increased and my customers love it. I especially appreciate being able to change things just knowing basic word processing and not having to know a thing about programming or really how the website is put together. The response when I do have questions is quick and terrific.

FLEXCMS is an Excellent Program, Apr 1st, 2006

Reviewed By: sandyscandles

I'm very pleased with the FlexCMS package. It is reasonably priced, and easy to use. Having an online store, means having to update my web pages frequently to add new items with pictures. Whether it is editing my pages, adding pictures, or reveiwing the hits to my website, I am able to do it myself with just basic computer knowledge. If I have questions, the FlexCMS team gets back to me quickly to provide their assistance. I could'nt have made a better choice for making my dream happen.

Why so many good reviews, May 15th, 2006

Reviewed By: englishbot

You may ask yourself, (I know I did) why are there so many positive reviews for this content management system?

Well the short answer, (having now tried it), is because it really is an excellent product.

The longer answer goes something like this.

It's really simple to use, great backup (no I mean it,) and a product that has been so well thought through that the big boys should stop and take a lesson.

I've paid out real money for this and I will do again.

Well done to everyone involved.

Total Solution - extremely affordable and easy to use!, May 16th, 2006

Reviewed By: CaroTravel.com

My skills are very limited so believe me when I say I needed EASY! I found the total solution in FlexCMS. My favorite feature is the date range for pages to turn on and off automatically - in my line of business, that saves me hours of time! Besides the ease of use, I am saving money as I chose the FlexCMS Pro Hosted plan. For under \$100 per year, my site is not only hosted but I get to use this great software as well! You just can't get a better deal than FlexCMS!

FlexCMS Gets An A+++ Excellent Software & Support!, Mar 17th, 2007

Reviewed By: davenport-designs

A clients recommended that I try FlexCMS for my business website. I have to admit I was hesitant at first due to prior experience with companies that promise you 'easy' but fail to deliver. I decided to take the 'risk' and I'm really glad I did. Not only do I have my business website on FlexCMS, I also use it for my wedding website. It is EASY TO USE and I love how I will be able to grow my sites at my pace using more modules, etc. My sites: DavenportDesignsLtd.com & Davenport-Imber.com
