## CJ GoogleBot Activity

Hits: 3,698

**Description:** The CJ GoogleBot Activity script is included on any of your web pages (works best for database driven or dynamic websites). The included script will execute whenever GoogleBot is on the prowl. When GoogleBot crawls the page it is logged; the date, robot, crawler and page crawled. You can then view your log file via an admin interface which allows you to sort the log either in ascending or descending order, export the log; to a 'textarea' (ready for cut and paste), clear the log; which required an admin password, and of course browse the log; from page to page. This script is a must have for any web designer out there that is trying to market their site with Google in the best way possible.

**Sweet and Simple Google Tool**, Jan 27th, 2004

Reviewed By: jj\_guest1980

I'm very fond of CJ's scripts so when this one came along I got it straight away. Its a great, simple tool that will pick up GoogleBot and track him as he crawls. I got it because I wanted to see which pages were being crawled the most, this script showed just that, cant wait for the next version...
