Search Your Site Search Engine

Hits: 28,638

Description: Easy to implement search this site search engine script. Comes with customizable template. No programming or database backend required (utilizes Google via the Google API). It can also give spelling suggestions for misspellings automatically (works for any word in any language, even ones not in dictionary).

Resource Specifications

Version:	1.2
Platform(s):	linux, windows, freebsd, osx, sun
Price:	Free
