## Krazy Kenny's slide show

Hits: 3,895

**Description:** As usual, I couldn't find a script that did what I wanted, so I studied until I could make my own. This script displays a main picture and next/previous thumbnails as links which will reload the page with the appropriate picture. You must upload seperate pics and thumbnails, as well as .txt files for captions if you want to use them. The good news is that once installed, all you have to do is upload additional files, because the script will read your directory and include all pics in the show.

### Resource Specifications

|                      |                |
|----------------------|----------------|
| <b>Version:</b>      | 1.0            |
| <b>Price:</b>        | free           |
| <b>Date Added:</b>   | Jan 25th, 2004 |
| <b>Last Updated:</b> | Jan 29th, 2004 |
