Templates - why and how to use them in PHP3 Hits: 3,756

Description: This tutorial shows you how to create a template-based Web site using FastTemplate class by [CDI](http://www.thewebmasters.net/php/>CDI). By using FastTemplate you can change the look of your entire web site in seconds, use abstract programming without HTML, and your Webpage designer does not need to take care of all that "fuzzy" code.
