SwgCalendar

Hits: 5,126

Description: An ASP.NET Calendar component that accepts a DataTable with a list of appointments as one of the parameters, and renders both the monthly and daily appointments.

Designed to run in a frameset.

The .zip file contains a Visual Studio project with a sample application.

Current version 1.1.

Availability: Freeware

Feel free to use, at your own risk, in any kind of application.

We are working on version 2.0, which is going to be released as shareware hopefully before the end of 2003.
