Live Winsocket

Hits: 1,354

Description: The Live Winsocket component is an ActiveX COM dll which abstracts the Microsoft® winsock api into an easy to use control. The Live Winsocket component was designed to free the developer from spending unnecessary project time learning the Winsock 2 extensive API and writing low-level C code.

The Live Winsocket component allows developers to quickly implement standard IP protocols such as HTTP, SMTP, FTP as well as develop custom protocols using streaming or datagram based sockets.

Resource Specifications

Version:	1.0
Platform(s):	Windows 2000, XP, NT, ME, 98
Price:	59.99
Date Added:	Feb 5th, 2004
Last Updated:	Feb 21st, 2004
