LGR Photo

Hits: 12,085

Description: Easily create thumbnail galleries using LGR Photo. Script creates links to a larger photo, and can display EXIF comment information. Creates the thumbnail images for the JPEGs that are in the folders. The look is customizable with headers and footers. Comes with a default style sheet to help with presentation. Outputs valid XHTML. The script was designed to be easily intergrated into any websites look. The main feature of the script is it ease of use. Simply place it in the same folder as some JPEG images and it will create the thumbnails and links for you.

Requires: PHP 4, GD Libraries.
