# Javascript Email Validator

Hits: 10,701

**Description:** Good general purpose email validation. Supports notion of "required" or "optional" for the field. Well commented and documented, so it is easy to understand and modify. Does not use Regular Expressions, like most of the other free email validators do. Self contained in a .js file, no need to cut-and-paste function into each page.

## Resource Specifications

<b>Version:</b>	1.1
<b>Platform(s):</b>	linux, windows, freebsd, osx, sun

## Reviews for Javascript Email Validator

**alright!**, Jan 14th, 2005

Reviewed By: badbadbenji

The validator is nice, quick and can easily be re-coded for individual purposes.  
The flaw is that it' written in JS.

My opinion.

Regards!
