BBeasy

Hits: 3,439

Description: BBeasy is a functional bulletin board made in PHP. It is lightweight, and is extremely fast. Its features include usergroups, multiple categories, and boards, polls, and announcements. This software is opensource, and completely skinnable, though it can not be edited and re-released. It will also require NO Database! You can run it on servers that dont have DB support, like mysql. Please enjoy this wonderful software.

Resource Specifications

Version:	1.0.0
Platform(s):	PHP (Must install php on your server.)
