PHP-JAVA CLASS Code Generator

Hits: 1,408

Description: This tool is designed in such a way to facilitate the creation of java and php classes in javabeans style. It is extremely useful in case you have a Mysql table and you would like to generate a class over this table which would have a constructor, saving (updating) and drop option, and to provide the possibility to enter and query internal variables assigned for each field of the table. The advantage this generator provides is generating a class skeleton which may be altered in the future. The disadvantage consists in reduced applicability as it is useful in case the first field is set as Primary Key.

Resource Specifications

Version:	1.1.0
Platform(s):	linux, windows, freebsd
Price:	FREE
Date Added:	Feb 24th, 2004
Last Updated:	Feb 9th, 2008
Author:	GraFX Software Solutions

Average Visitor Rating:  **3.85** (out of 5)

Number of Ratings: 40 Votes

Average Member Rating:  **0.00** (out of 5)
