Mike's Download Counter

Hits: 8,233

Description: Download Counter is an open source download counter / tracking script designed to be small, fast and easy to customise to your own requirements. Multiple files per download and an Admin Control Panel are new in this release. Downloads are tracked on a per day basis which will form the graphing element when written. It has been written in PHP/MySQL and the download contains all the source code and database creation scripts to get you started. 0.3 is currently in alpha test and will be released shortly. See mikeleigh.com for more information on this.
