This script has some pro's and con's.

-- Pro's:

1. Does just what it says, and does it well.
2. Is easily configurable, from main script to css.
3. Is also easily modified - though I didn't need to do that, personally.
4. Doesn't rely on MySQL (which is always a good thing lol).
5. It just ROCKS!
6. It's free.
7. It's free, it works, doesn't rely on SQL, easy to configure... and did I already mention, IT ROCKS?

Now, the con's:

1. It doesn't do the dishes...
2. It wasn't made by me... now I'm jealous! :p
3. It isn't a tall blonde woman carrying trays of free beer and pizza.
4. it's so hard to find any REAL con's... it's just so brilliant.
