Description: This is a free application for your Website to save the name and email-addresses of your webpage visitors in a file. You can import that file directly into the address book of Netscape Communicator. So you can run you own newsletter service in minutes. It allows you to manage as many files as you want, so you can offer many different topics on your webpages.

Resource Specifications

Version:	1.00
Platform(s):	Win 95/98/NT
Price:	Free
Date Added:	Dec 21st, 1999
