AWStats Log Format Creation Tool

Hits: 8,836

Description: Setup your AWStats log file format string with this easy tool. Open your log file and check all the headings below that you see in your log file header. Ideal for those using web hosts who do not know which logging options are available within their log files. Download your log file from your host and check all the headings you see to create your Log Format string for your aw stats .conf file.

Resource Specifications
