## Guestbook Addin with access database Hits: 1,705

**Description:** Using ASP and a Access database, our guestbook is a FrontPage® add-in template which allows you to match the look and feel of your site. A built in administration area is where you can edit and delete visitor entries. You can easily edit your new guestbook anytime from your web browser. You do not have to have FrontPage® opened to perform administrative functions. Easy to use and modify.

### Resource Specifications
