IMS Pro (with Photo Albums)

Hits: 38,282

Description: The IMS Pro is a complete solution for webmasters who want to create their own image hosting service. The script includes many features such as PayPal integration, bandwidth/space tracking, photo albums (public or private), instant user signups/upgrades/cancellations, 3 simultaneous upload slots, PDF support, multiple image folders, image rotate/resize, a built-in support area with FAQ and contact form, customizable payment plans for users, image and folder descriptions, a "get code" feature for generating HTML or bulletin board links to images, a demonstration mode for showing potential customers what they will get, automatic thumbnails, an efficient MySQL/PHP image serving process, and much more. Installation is included for free!

IMS Pro Image Management System Professional, Jul 16th, 2004

Reviewed By: daveherbert

I had been looking for a php solution for an image hosting website for a while. Like everyone else I was looking for a free solution. No joy, I have tried them all. After hesitantly buying IMS Pro I have come to the conclusion it was worth every penny. Not just the software but also the support . After a few installation problems, related to my server, not the software. I found IMS Pro to be very easy to use with practically no learning curve. I am very impressed with IMS Pro and Webligo.
